

BINANCE FUTURES TRADING BOT - SCREENSHOT SUBMISSION GUIDE

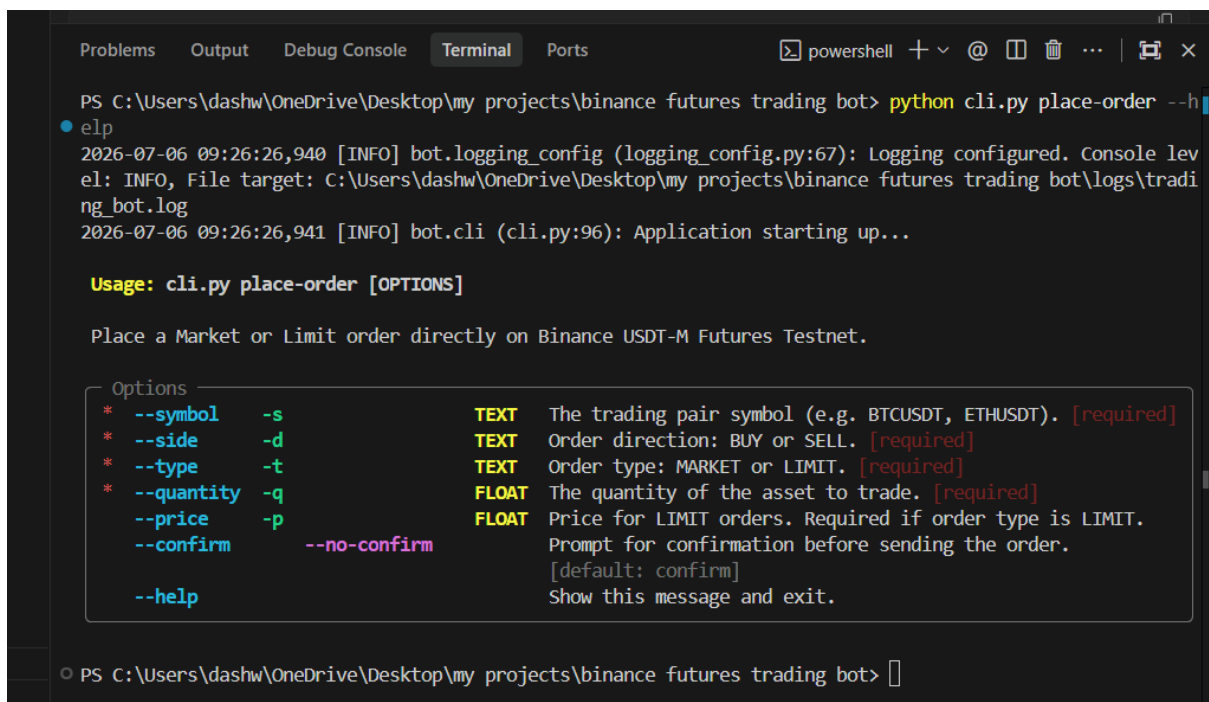

1. COMMAND HELP DOCUMENTATION

Command to run:

```
python cli.py place-order --help
```

screenshot:

The terminal output showing all parameters (--symbol, --side, --type, --quantity, --price, --confirm) with their respective descriptions and default values.

```
PS C:\Users\dashw\OneDrive\Desktop\my projects\binance futures trading bot> python cli.py place-order --help
2026-07-06 09:26:26,940 [INFO] bot.logging_config (logging_config.py:67): Logging configured. Console level: INFO, File target: C:\Users\dashw\OneDrive\Desktop\my projects\binance futures trading bot\logs\trading_bot.log
2026-07-06 09:26:26,941 [INFO] bot.cli (cli.py:96): Application starting up...

Usage: cli.py place-order [OPTIONS]

Place a Market or Limit order directly on Binance USDT-M Futures Testnet.

Options
* --symbol -s TEXT The trading pair symbol (e.g. BTCUSDT, ETHUSDT). [required]
* --side -d TEXT Order direction: BUY or SELL. [required]
* --type -t TEXT Order type: MARKET or LIMIT. [required]
* --quantity -q FLOAT The quantity of the asset to trade. [required]
  --price -p FLOAT Price for LIMIT orders. Required if order type is LIMIT.
  --confirm --no-confirm Prompt for confirmation before sending the order.
                        [default: confirm]
  --help Show this message and exit.
```

2. OFFLINE VALIDATION SAFEGUARD

Command to run:

```
python cli.py place-order --symbol BTCUSDT --side BUY --type LIMIT --quantity 0.01
```

screenshot:

The red-colored error message output: "Validation Error: LIMIT orders require a price." showing that the program exited safely without connecting to the internet.

```
